1 **Perspectives**

Original Articles

2 Passive Total Respiratory System Compliance and Gas Exchange in Newborns With Hyaline Membrane Disease
E. Driezzen, M. Migdal, J.P. Praud, M.A. Saby, B. Chambille, M. Dehan, and C. Gaultier

8 Evaluation of the Flow-Volume Loop as an Intra-Operative Monitor of Respiratory Mechanics in Infants
K. Brown, P.D. Sly, J. Milic-Emili, and J.H.T. Bates

14 Airway Pressures During Crying in Healthy Infants
Felix R. Shardonofsky, Daniel Perez-Chada, Esteban Carmuega, and Joseph Milic-Emili

19 Resting Oxygen Consumption and Ventilation in Cystic Fibrosis
Judith Ann Hirsch, Shao-Ping Zhang, Michael P. Rudnick, Frank J. Cerny, and Gerd J. Cropp

27 Predicting Arterial Oxygen Tension From Maximum Expiratory Flow Volume Curves in Cystic Fibrosis
Arlene A. Stecenko, Linda Postotnik, and Ronald G. Thomas

31 Reducing Inadvertent PEEP by Controlling End-Tidal Pressures in the Trachea
Felipe Gonzalez, Jeffrey Carlstrom, and Peter Richardson

36 Short-Term Variability of Pulmonary Function Tests in Infants With Bronchopulmonary Dysplasia
Bruce G. Nickerson, David J. Durand, and Lily C. Kao

42 Immunoreactive Trypsinogen Screening for Cystic Fibrosis: Characterization of Infants With a False-Positive Screening Test
Michael J. Rock, Elaine H. Mischler, Philip M. Farrell, W. Theodore Bruns, David J. Hassemer, and Ronald H. Laessig

49 Changes in Pulmonary Mechanics Following Caffeine Administration in Infants With Bronchopulmonary Dysplasia
Jonathan M. Davis, Vinod K. Bhutani, John L. Stefano, William W. Fox, and Alan R. Spitzer

53 Acute Effects of Oxygen, Nifedipine, and Diltiazem in Patients With Cystic Fibrosis and Mild Pulmonary Hypertension
Alex Davidson, Axel Bossuyt, and Isidoor Dab

Conference Report

60 International Pediatric Respiratory Meeting, Terrigal, Australia, March 10–13, 1988
Peter D. Phelan and Peter D. Sly

68 **Pediatric Pulmonology News**

Volume 6 • Number 2 • 1989

Guest Editorials

69 Sarcoidosis in Children: Personal Observations on Age Distribution
Edwin L. Kendig, Jr.

71 Assessment of Changes in 1-Second Forced Expiratory Volume in Bronchial Provocation Testing
Michael Wall

Original Articles

74 Effects of Inhaled Metaproterenol and Atropine on the Pulmonary Mechanics of Infants With Bronchopulmonary Dysplasia
Lily C. Kao, David J. Durand, and Bruce G. Nickerson

81 Effect of Inhaled Ipratropium Bromide on Methacholine and Exercise Provocation in Asthmatic Children
A.L. Boner, G.Vallone, and G. De Stefano

86 A Computer-Model Analysis of the Influence of the Upper Airway on Passive Flow-Volume Loops in Infants
Peter D. Sly

91 Long-Term Tobramycin Aerosol Therapy in Cystic Fibrosis
Gratiana Steinkamp, Burkhard Tümmler, Monika Gappa, Anne Albus, Jürgen Potel, Gerd Döring, and Horst von der Hardt

99 Increased Bronchial Responsiveness to Histamine Associated With Shortened Inhalation Time
C. Vázquez and J. Rodríguez-Soriano

103 Mechanics and Energetics of Breathing in Newly Diagnosed Infants With Cystic Fibrosis: Effect of Combined Bronchodilator and Chest Physical Therapy
Karen A. Hardy, Marla R. Wolfson, Daniel V. Schidlow, and Thomas H. Shaffer

109 Prenatal Relationship of Surfactant Lipid and Protein Constituents in Infants With Respiratory Distress Syndrome: A Preliminary Communication
Deborah B. Wilbur, June E. Paciga, Sue A. Shelley, Keith S. Kanarek, Gary Cohen, and John U. Balis

113 The Reproducibility and Agreement of Three Indices of Airway Responsiveness to Histamine in Asthmatic Children
W.M.C. van Aalderen, J. Gerritsen, G.H. Koëter, L.T. van der Weele, D.S. Postma, and K. Knol

118 A Correction Formula for Computing Specific Airway Resistance From a Single-Step Measurement
Janusz Haluszka, Grzegorz Willim, Renato Cutrera, Roberto Ronchetti, and Slavi Filtcher

122 Effect of Chest Wall Oscillation on Mucus Clearance: Comparison of Two Vibrators
Eben M. Rubin, Gregory E. Scantlen, Gillette A. Chapman, Mungen Eldridge, Rogelio Menendez, and Adam Wanner

127 Estimation of Maximum Expiratory Flow-Volume Variables in Children
Danny Houthuijs, Bregt Remijn, Bert Brunekreef, and Rian de Koning

137 **Perspectives**

Original Articles

138 Wheezing at 8 and 13 Years: Changing Importance of Bronchiolitis and Passive Smoking
Kenneth M. McConnochie and Klaus J. Roghmann

147 Lung Perfusion and Aerosol Distributions in Preterm Ventilated Lambs
David Berry, Machiko Ikegami, and Alan Jobe

153 Nontypable *Haemophilus influenzae* Nosocomial Pulmonary Infections in Children Following Intubation
Ralph A. Hicks, V. Fred Burry, Lloyd C. Olson, and Mary Anne Jackson

158 Comparison of Conventional and High-Frequency Ventilation in Piglets After Lung Lavage
Leandro Cordero, Richard D. Tallman, Jr., Ray Wasielweski, and Cindy Nissen

164 Respiratory Syncytial Virus Alters Electrophysiologic Properties in Cotton Rat Airway Epithelium
Michelle M. Cloutier, David Wong, and Pearay L. Ogra

169 Hypercapnia in Relation to Pulmonary Function in Duchenne Muscular Dystrophy
Gerard J. Canny, Amir Szeinberg, Jan Koreska, and Henry Levison

172 Bronchodilation From Intravenous Theophylline in Patients With Cystic Fibrosis: Results of a Blinded Placebo-Controlled Crossover Clinical Trial
Shi-Hui Pan, Daniel M. Canafax, Chap T. Le, Robert J. Cipolle, Donald L. Uden, and Warren J. Warwick

Therapeutic and Diagnostic Methods

180 Accuracy of Two Wavelength Pulse Oximetry in Neonates and Infants
J.-P. Praud, A. Carofilis, F. Bridey, F. Lacaille, M. Dehan, and C.L. Gaultier

183 Decreased Incidence of Subglottic Stenosis Using an "Appropriate Sized" Endotracheal Tube in Neonates
James M. Sherman and Hillary Nelson

186 Dimensions of the Trachea to Age 6 Years Related to Height
N. Thorne Griscom, Mary Ellen B. Wohl, and Terence Fenton

Case Reports

191 Longitudinal Evaluation of Pulmonary Function in an Infant Following Chlorine Gas Exposure
Deborah C. Givan, Howard Eigen, and Robert S. Tepper

195 Characterization of Prolonged Apneic Episodes Associated With Respiratory Syncytial Virus Infection
Deborah L. Pickens, Georgia L. Schefft, Gregory A. Storch, and Bradley T. Thach

Volume 6 • Number 4 • 1989

Original Articles

213 Changes in the Spatial Distribution of Pulmonary Blood Flow During the Fetal/Neonatal Transition: An In Vivo Study in the Rabbit
Jill Lipsett, Kerri Hunt, Colin Carati, and Bren Gannon

223 Cough Flow-Volume Relationships in Normal and Asthmatic Children
Caroline S. Beardsmore, Alan Park, Stephen P. Wimpress, Anne H. Thomson, and Hamish Simpson

232 Viral and *Mycoplasma pneumoniae Pneumonias* in School-Age Children: Three-Year Follow-Up of Respiratory Function
Tommaso Todisco, Fernando M. de Benedictis, and Maurizio Dottorini

237 Effect of Cyclic Adenosine Monophosphate Elevations on Functional Responses of Polymorphonuclear Leukocytes From Patients With Cystic Fibrosis
Susanne Suter, Isabelle Chevallier, Karl H. Krause, and Daniel P. Lew

242 Expression of Results of Histamine Challenge
J. Reiser, J. Wadsworth, A. Nunn, and J.O. Warner

246 Monitoring Theophylline Levels in Serum and Saliva Using Fluorescence Polarization Immunoassay and Seralyzer
Theodor Schulte, Wernfried Buhr, Marco Schmidt, Andreas Walkenbach, and Dietrich Berdel

253 Bronchial Reactivity in Infants in Acute Respiratory Failure With Viral Bronchiolitis
George B. Mallory, Jr., Etsuro K. Motoyama, Anastassios C. Koumbourlis, Rebecca L. Mutich, and Don K. Nakayama

260 Risk Factors for the Development of Posterior Subcapsular Cataracts in Patients With Cystic Fibrosis and Allergic Bronchopulmonary Aspergillosis Treated With Corticosteroids
Marc Majure, Salman Mroueh, and Alexander Spock

263 Reliable Salbutamol Administration in 6-to 36-Month-Old Children by Means of a Metered Dose Inhaler and Aerochamber With Mask
W.T. Conner, M.B. Dolovich, R.A. Frame, and M.T. Newhouse

Case Reports

268 Subglottic Inflammatory Pseudotumor in a 6-Year-Old Child
J. Zapatero, J. Lago, L. Madrigal, B. Baschwitz, E. Perez Rodriguez, R. Penalver, and J. Candelas

272 Use of Maximal Expiratory Flows to Evaluate Central Airways Obstruction in Infants
Robert S. Tepper, Howard Eigen, John Brown, and Roger Hurwitz

State of the Art Review

275 Pulmonary Manifestations of Immune Deficiency Diseases
Juan L. Sotomayor, Steven D. Douglas, and Robert W. Wilmott

Instructions to Authors

Original Contributions that have never been published and are not under simultaneous consideration by another publication should be submitted

from **North America,** to:
George Polgar, M.D., Editor
Pediatric Pulmonology
University of Pennsylvania
Children's Hospital of Philadelphia
P.O. Box 1118
King of Prussia, PA 19406, USA

from **Europe** and the **Near East,** to:
Maximilian S. Zach, M.D., Assistant Editor
Pediatric Pulmonology
Universitäts Kinderklinik
Auenbruggerplatz 30
A-8036 Graz, Austria

from everywhere else, to:
Peter D. Phelan, M.D., Assistant Editor
Pediatric Pulmonology
University of Melbourne
Royal Children's Hospital
Flemington Road
Parkville, Victoria 3052, Australia

The original manuscript and illustrations suitable for publication should be provided, together with three copies of the text and two extra sets of illustrations.

All manuscripts submitted to Pediatric Pulmonology may not have been published in any part or form in another publication of any type, professional or lay, and become the property of the publisher. After acceptance of a manuscript for publication, authors will be requested to sign an agreement transferring copyright to the publisher who reserves copyright. No published material may be reproduced or published elsewhere without the written permission of the publisher and the author. The journal will not be responsible for the loss of manuscripts at any time. All statements in, or omissions from, published manuscripts are the responsibility of the authors who will assist the Editor by reviewing proofs before publication.

Types of Articles: Original articles, results of clinical and laboratory research, reviews, letters to the Editor, book reviews, reports of meetings, invited editorials, symposia under ad hoc editors, selected abstracts, and exceptionally instructive case reports are published. Preliminary communications will be considered only if they contain information that can be considered a breakthrough. The length of manuscripts is not limited but the author(s) should be aware that long manuscripts are more difficult to publish owing to space limitations. The Editor reserves the right to return any manuscript that is not in acceptable English. Translations from another language will not be provided by the Editorial Office.

Peer Review: All articles are reviewed by two or more authorities to determine validity, significance, and originality of contents and conclusions. Authors usually will be advised at the latest within eight weeks whether their paper is accepted, requires revision for acceptance, or is rejected. The reviewers will be selected by the Editor and his associates, including Section Editors and Interdisciplinary Editorial Board members. The selection will be made on the basis of expertise and equal distribution among the available experts, regardless of geographic origin of manuscript or locations of the reviewers.

Preparation of Manuscripts: Standard manuscript format is requested: double-spaced type; preferably on 8 1/2 × 11" (21.5 × 28 cm) bond paper; ample margins to keep text within frame of 6 × 9" (15.25 × 22.75 cm).

Title page: The title should be brief and useful for indexing. All authors' names should be listed, with highest academic degree and affiliation of each. In case of cooperative studies, the institution where the research was actually or primarily done should be indicated. Restrict authorship to direct participants. Specify, in a separate paragraph, grants and other financial support received, the granting institutions, and the meeting, if any, at which the paper was presented. The name, complete mailing address, and telephone number of the person to whom correspondence and requests for reprints are to be sent must be included.

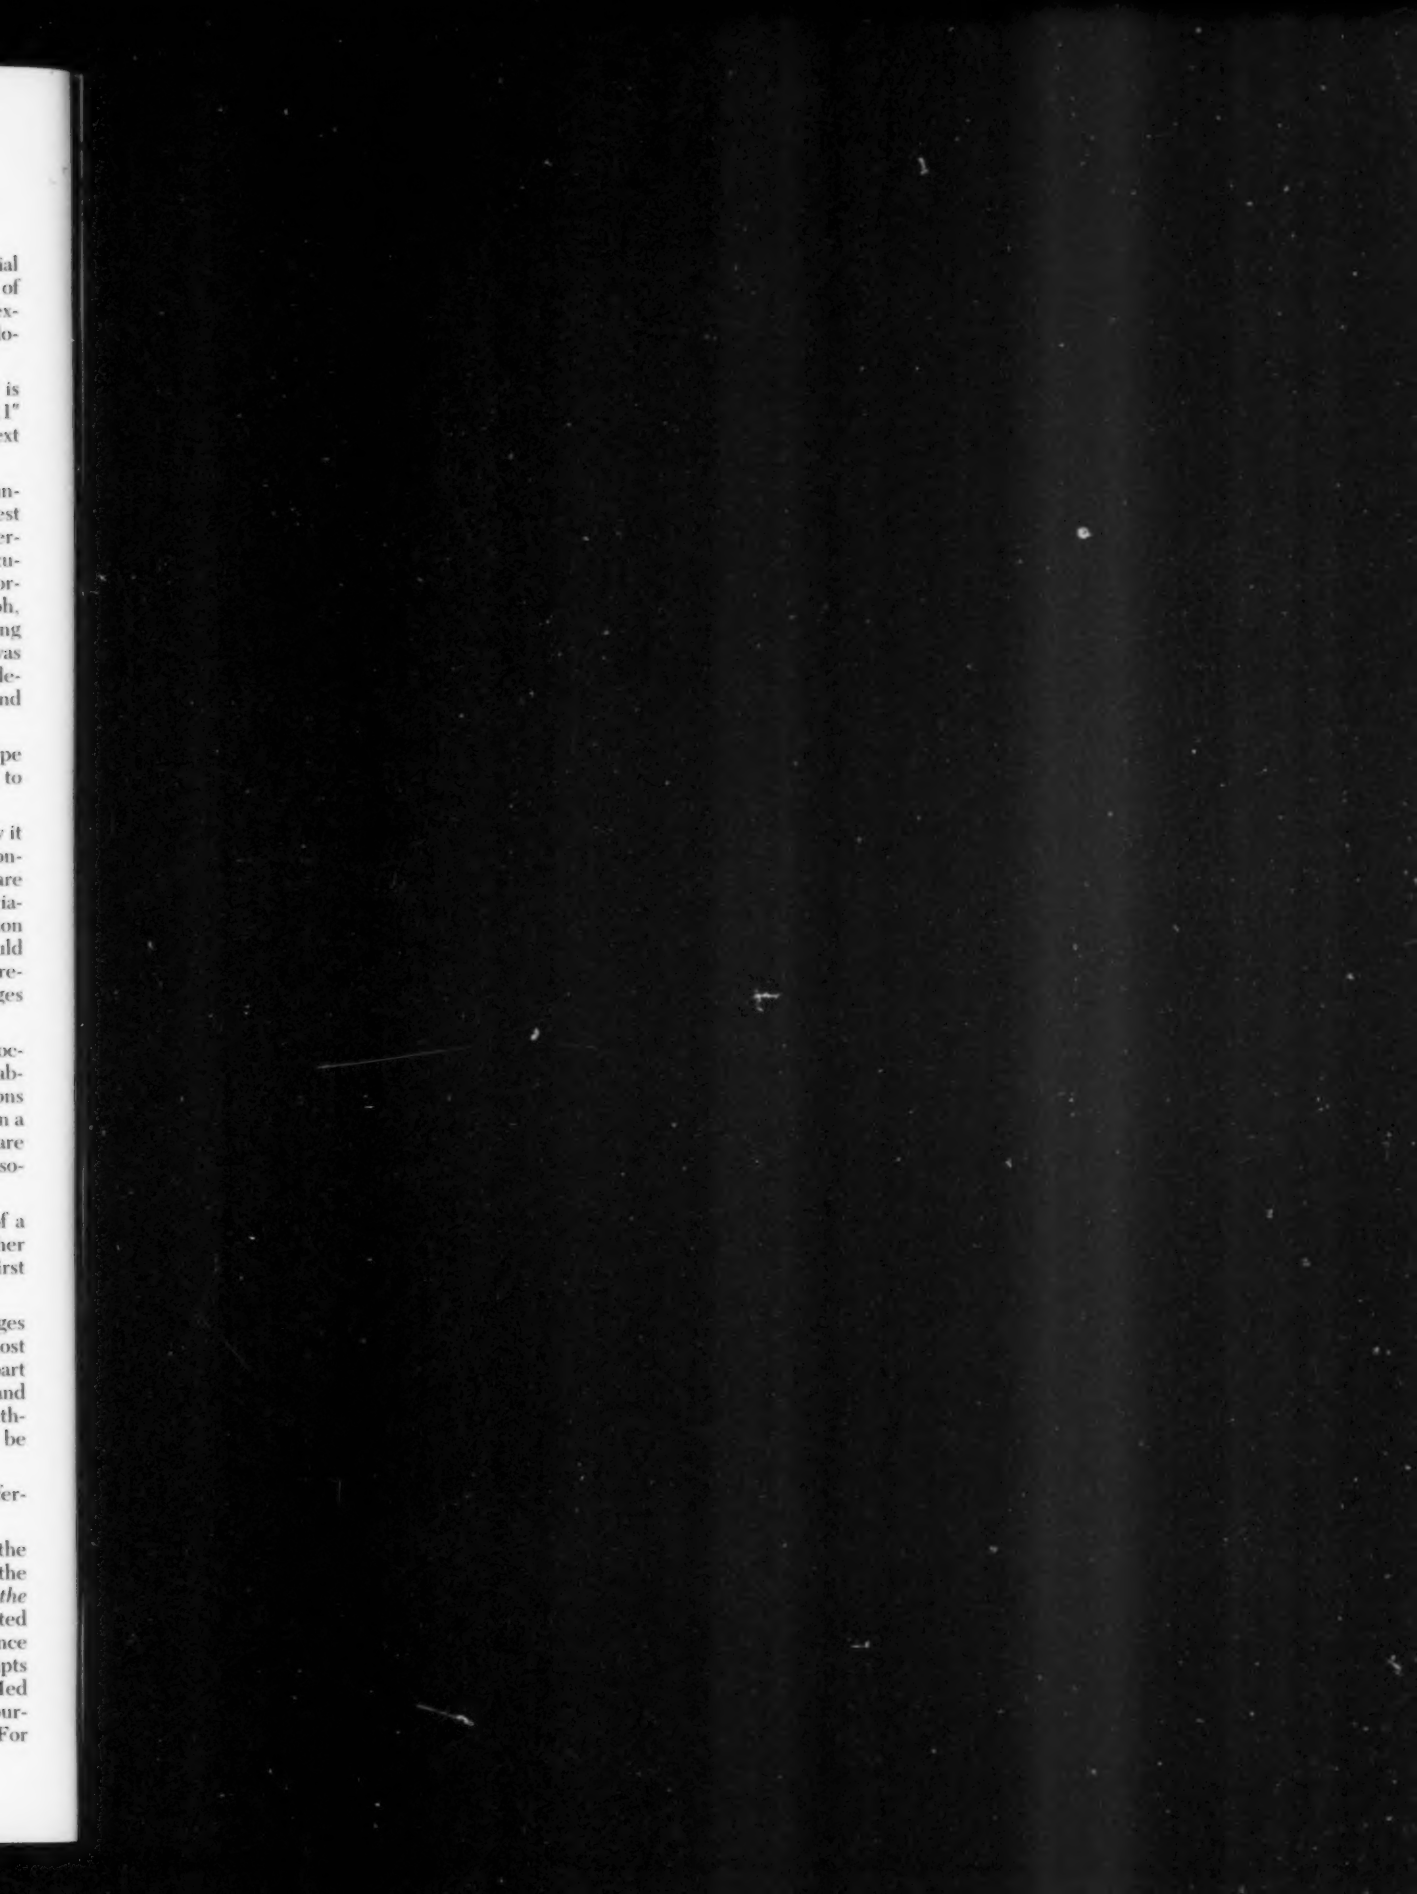
Abbreviated title: On the bottom of the title page, type the essence of the title using no more than 50 characters, to be used as a running head.

Summary: Summarize what was studied; why and how it was studied; the results, including important data; and conclusions stemming from the results. If abbreviations are used, spell out the appropriate words with the abbreviations between parentheses. Do this only if the abbreviation is used several times in the Summary. Summaries should not exceed one double-spaced page. Case reports and reviews do not need summaries. Summaries in languages other than English are not required.

Abbreviations: Define abbreviations when they first occur in the manuscript and from there on use only the abbreviation. When a great number of unusual abbreviations are used, list them alphabetically with their definitions on a separate page. Whenever standardized abbreviations are available, use those; create new abbreviations only if absolutely unavoidable.

Drug names: Use generic names. If identification of a brand name is wanted, insert it in parentheses together with the manufacturer's name and address after the first mention of the generic name.

Text: Start the text on a new page and number pages consecutively. Type author's last name on each page. Most articles will fall appropriately into the standard four-part form: Introduction, Materials and Methods, Results, and Discussion. Start each of the parts on a new page. All methodology including statistical analyses of results should be described in Materials and Methods.

Acknowledgments: Technical assistance, advice, referral of patients, etc. may be briefly acknowledged.


References: Start the listing on a new page with the appropriate title. *Double-space throughout.* Number the references in the sequence *in which they first appear in the text,* listing each only once even though it may be cited repeatedly. References should conform to the reference style given in the "Uniform Requirements for Manuscripts Submitted to Biomedical Journals" (see Ann Intern Med 1982;96:766-771, or Br Med J 1982;284:1766-1770); journals' names to their abbreviated title in Index Medicus. For
